Summary

Front-End Developer specializing in the React and Next.js ecosystem, with a proven ability to ship production-ready, user-facing applications that real people choose to use. I build with TypeScript, TanStack Query, and Radix UI — prioritizing component reusability, accessibility, and measurable performance. I've independently architected and deployed platforms serving active users, integrating third-party APIs and optimizing for SEO and web standards. I work end-to-end — from architecture decisions to Vercel deployment — and I leave codebases cleaner than I found them.

Experience

Frontend Developer — Elevate Tech

Feb 2026 – Present

Internship · Cairo, Egypt

- Independently built and shipped an **Exam Platform with full admin dashboard**, achieving **98 Performance, 100 Best Practices, and 100 SEO** scores on Lighthouse — deployed live on Vercel.
- Built with **Next.js 15 and TypeScript**, delivering a production-ready application with an **89 Lighthouse accessibility score** and clean, maintainable component architecture.
- Contributing to **3 additional team-based projects** using Next.js, TypeScript, and React — working across collaborative sprints with a multi-developer team.

Customer Service Agent — Xceed

Jul 2026 – Present

English Account · On behalf of the Egyptian Ministry of Tourism and Antiquities · Cairo, Egypt

- Handling **inbound English-language calls** from international tourists and visitors, covering inquiries, complaints, and service requests for the Egyptian Ministry of Tourism and Antiquities.
- Managing customer interactions end-to-end using a **structured call framework** — from opening and information gathering through to resolution and closing.
- Applying **active listening and de-escalation techniques** to handle difficult callers calmly, ensuring every interaction ends with a satisfied customer.
- Communicating complex information clearly in **professional English** to non-native and native speakers across multiple nationalities and cultures.

Skills

Core: React 19, Next.js 15, TypeScript, JavaScript (ES2024)

UI & Styling: Tailwind CSS, SASS/SCSS, Radix UI, Responsive & Accessible Design (WCAG)

Data & State: TanStack Query, Axios, REST API Integration, React Context

Performance & Quality: Lighthouse Optimization, Code Splitting, Smart Caching, SEO Best Practices

Tooling: Git, GitHub, Vite, Vercel, Next Auth, Stripe Integration

Practices: Component-Driven Architecture, Performance Optimization, Accessible UI Patterns, Cross-Team Communication

Projects

HDStream — Streaming Platform

Nov 2025

Full-featured streaming platform built for real users, with fallback infrastructure and 500,000+ titles.

- Built** with Next.js 15, TypeScript, and TanStack Query, achieving a **100 SEO score** and **96 Best Practices score** on Lighthouse.
- Integrated TMDb API** to deliver a **500,000+ title catalog** with full search, filtering, and detail views across movies and TV shows.
- Engineered a **dual-player fallback system** with multi-quality playback, ensuring uninterrupted streaming when primary servers fail.
- Architected **20+ accessible, reusable Radix UI components** shared across the entire application — achieving an **86 Lighthouse accessibility score**.

- Deployed on Vercel and **actively adopted by real users** as a free alternative to paid streaming platforms.

Personal Portfolio

Nov 2025

Personal portfolio engineered for performance — achieving a perfect Lighthouse score across Performance and Best Practices.

- **Built** with React 19, TypeScript, and Vite, achieving a perfect **100 Lighthouse Performance score** and **100 Best Practices score**.
- **Designed a fully responsive layout** with Tailwind CSS, supporting all screen sizes with a **91 SEO score** and **88 accessibility score**.
- **Implemented Radix UI primitives** to ensure keyboard navigation, screen reader support, and WCAG-compliant component behavior.

My Shop — E-Commerce Platform

Aug 2025

Full-stack e-commerce application with authenticated checkout and Stripe payment integration.

- **Implemented session-based authorization with Next Auth**, protecting cart, wishlist, and checkout routes against unauthenticated access.
- **Integrated Stripe payment processing** with full end-to-end testing using Stripe’s test suite, supporting both card payments and cash-on-delivery flows.

My Social — Social Media Platform

Aug 2025

Social platform with complete content management, image handling, and account functionality.

- **Built** with React, Axios, and React Query, integrating **10+ API endpoints** covering the full feature set.
- **Developed full CRUD functionality** for posts and comments, including image uploads, profile picture updates, and account management.
- **Managed application-wide state with React Context**, synchronising user sessions, profile data, and dynamic content updates across all views.

Education

Faculty of Law, English Section — Menoufia University

2024

Bachelor’s Degree

Royal House Academy Language School

2018

High School Diploma

Courses

Front-End Web Development

Feb – Sep 2025

Route Academy — Egypt

Languages

Arabic — Native / Bilingual

English — Proficient
